Progressive Cinquain

©2011 Education Inspired

**Purpose:** To help students synthesize their learning while sharing, perception-checking their understanding, and collaborating on increasingly sophisticated written summaries utilizing a cinquain poetry format

**Materials:** paper, pencils, poster paper, markers

**Procedure:**
- Provide a model of a cinquain poem.
- Assign a topic (not a title) based on the reading or learning that was just completed.
- Each student writes a cinquain independently.
- As individual students finish, pair them up to share their poems and collaboratively write a new cinquain that is a combination of what they have written or a new one that is better.
- As pairs of students complete their new cinquain, combine two pairs of students into a foursome and have them share and collaboratively write a new cinquain that is a combination of what the two pairs have written or something entirely new.
- Students write their final product on poster paper.
- Each group shares their progressive cinquain with the entire class.
- Discuss how the cinquains reflect deep understanding of the topic.

Cinquain Format

Title - one word

Description - two adjectives

Action - three “ing” words

Feeling - four word phrase

Synonym for title - one word
