Remove the title, instruction cards, and answer key.2. Deal 5 domino cards to each player. Lay the extra cards face down to make a draw pile.3. The first player to the left of the dealer who has a double, meaning both words on the card have the same value, plays the double to start the game. If no player has a double, reshuffle and start over.4. Continuing around the group, players match ends of the cards by placing words with the same values together. Cards can be played on either end or either side of a double. | | <p>5. If a player cannot play in turn, one card must be taken from the draw pile. The card drawn can be played if it is a match. Once the draw pile is empty, no more cards must be drawn if a player cannot play.</p> <p>6. The first player to play all of his or her cards wins the game. The answer key may be used when a play is questioned.</p> <p>7.
