

Light Speed! Planets

©2004 Education Inspired

Groups of 2 Grades 3-6

How to Play

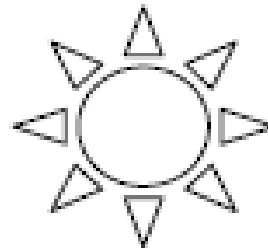

1. Remove the title and instruction cards. Shuffle all the remaining cards.
2. Make a draw pile of ten cards face-down, and pass out all the remaining cards; 20 to each player.
3. Players take the top five cards off their decks to keep in their hands. Only cards in the players' hands can be played.
4. To start the game, turn over the top two cards in the draw pile and place them face up on opposite sides of the pile.
5. Each player may either play a

- card of the planet that comes before or after the planets showing in either pile (in order from the Sun). "Sun" can be played on "Mercury" or "Neptune". "Neptune" can be played on "Uranus" or "Sun."
6. As a card is played from the hand, the top card from the player's stack should be added to the hand to keep five cards in the hand.
8. If neither player can play, the dealer can play the top card from the draw pile on either stack. Continue the game.
7. The first player to play all of his or her cards is the winner.

The planets are in the following order from the Sun:

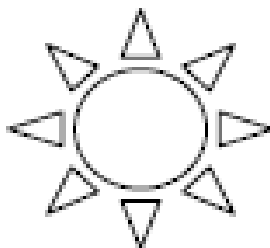

Sun
Mercury
Venus
Earth
Mars
Jupiter
Saturn
Uranus
Neptune
